Ocean solutions

Visy Global Logistics provides flexible solutions in the highly dynamic ocean freight market. Our comprehensive ocean freight service is designed to accommodate shipments of varying sizes and volumes, ensuring secure and timely deliveries. By leveraging our extensive network and expertise, we meet our customers' expectations with customized and reliable ocean freight solutions.

Direct to customer

Working closely with our customers, Visy Global Logistics develops comprehensive logistics solutions that go beyond port-to-port services. We provide integrated drayage and warehousing services, ensuring seamless supply chain management. Leveraging our extensive network and deep expertise in key trade lanes, we deliver cost-effective and optimized solutions for your freight. With customizable options, proven technology, and a range of space allocations and transit choices, Visy Global Logistics is your trusted partner for all-encompassing logistics solutions.
