What makes Visy glass unique?

Visy glass is made using recycled material and is designed to be recycled again, making it the ideal sustainable packaging solution.

Visy glass is raising the standard for recycled content in glass packaging with an average of 63% recycled glass included in all our Australia and New Zealand glass products.[2]

It's all about using more of what we already have to make new packaging. This means less waste, less pollution and lower energy consumption, helping to reduce our reliance on natural resources. All this adds up to lower carbon emissions which helps your brand meet its sustainability targets.[3]

It's better glass, **for a better world**.

---

1. Refers to the average recycled content for Visy's flint glass products manufactured at our Auckland plant in FY24 and includes both external glass and internal glass. Recycled content of products is not fixed and may alter from time to time due to changes in our supply chain.

2. Refers to the average recycled content for Visy's glass products manufactured at our Australia and New Zealand plants in FY24 and includes both external glass and internal glass. Recycled content of products is not fixed and may alter from time to time due to changes in our supply chain.

3. Based on Visy's FY21 glass Life Cycle Assessment conducted by thinkstep-anz.

More recycling, less landfill

Visy is Australia's largest vertically integrated recycler and remanufacturer.

We collect materials from households and businesses and turn them into sustainable packaging solutions, diverting valuable material from landfill and driving a circular economy for packaging.
