VISY

FOR A BETTER WORLD

Visy's new Botanica bottle in 700ml

Botanica is the ideal showcase for your expertly distilled gin, vodka, or rum. With a generous label panel, it gives you the freedom to create standout shelf appeal and elevate your product's brand presence.

Botanica is manufactured on our dedicated spirits line in Penrith, NSW, whose flint glass packaging boasted an average of **63% recycled content*** in FY25.

Backed by Visy's cutting edge technology and commitment to sustainability, the Botanica bottle is more than packaging, it's a powerful tool for building a distinctive, environmentally conscious brand.

What makes Visy glass unique?

Visy glass is made using recycled material and is designed to be recycled again, making it the ideal sustainable packaging solution.

By using recycled materials to create new packaging, we reduce waste, pollution, and energy use - protecting natural resources and lowering carbon emissions. It's a smarter, recyclable solution that can help your brand meet its sustainability targets.

It's better glass, **for a better world**.

The information in this brochure is provided at a point in time, being the date of this brochure, and may change without prior notice. This information does not constitute a warranty in relation to product performance. The performance of these product(s) may change due to many factors, including changes in our or your supply chain. This brochure is provided for general information purposes only and does not in any way supersede or amend any agreement you may have entered into with Visy governing the terms and conditions of supply.

*Recycled content includes both internal and external cullet (recycled glass). Recycled content of products is not fixed and may alter from time to time due to changes in our supply chain.

More recycling, less landfill

Visy is Australia's largest vertically integrated recycler and remanufacturer.

We collect materials from households and businesses and turn them into sustainable packaging solutions, diverting valuable material from landfill and driving a circular economy for packaging.
